PROFESSIONAL SUMMARY

Python Backend Developer with hands-on experience building web applications using Python, Django, FastAPI, and SQL. Skilled in REST API development, backend system design, debugging, and database-driven applications. Experienced in authentication systems, workflow automation, and backend integration. Focused on building reliable backend systems and optimizing application performance.

SKILLS

- **Languages:** Python, SQL, JavaScript
- **Backend / Frameworks:** Django, FastAPI, REST API Development, CRUD Operations, Authentication Systems
- **Databases:** SQL (Oracle)
- **Concepts:** Data Structures, Debugging, Troubleshooting, Workflow Automation, Backend Architecture
- **Web Technologies:** HTML, CSS, JavaScript
- **Tools & Platforms:** Git, GitHub, VS Code

INTERNSHIPS EXPERIENCE

Internpe, Web Developer Intern, Oct 2023 - Dec 2023

- Developed an e-commerce web application using Python, HTML, CSS, and JavaScript.
- Assisted in backend development and database management using SQL.
- Designed responsive user interfaces and improved overall application usability.
- Maintained technical documentation and performed debugging to ensure application functionality

Zidio Development, UI/UX Intern (Jan 2025 to Feb 2025)

- Designed a **Task Management Application** focusing on user workflow and productivity.
- Led the entire UX/UI design process, including **user research, wireframing, prototyping, and usability testing**, ensuring a user-centric approach.
- Delivered an intuitive, functional, and visually appealing interface that streamlined task organization and improved overall user productivity.

PROJECT EXPERIENCE

AI-Driven Task Prioritization System

Tech Stack: Python, Django, SQL, HTML, CSS, JavaScript

- Developed a full-stack Python application to manage and prioritize tasks using rule-based logic automatically.
- Implemented backend logic using Python and Django with SQL database integration.
- Designed data workflows for task tracking and automated prioritization.
- Built a responsive dashboard and UI components for efficient task monitoring.

Online Food Ordering System

Tech Stack: Python, Django, SQL, HTML, CSS, JavaScript

- Developed a Django-based food ordering platform with menu browsing and order management.
- Implemented user authentication and a session-based login system.
- Integrated backend database for storing user orders and menu items.
- Designed a responsive UI for a smooth ordering experience.

CERTIFICATIONS & ACHIEVEMENTS

- **Python Full Stack Development Course** - PySpiders, BTM | May 2025 – Present.
- **Best Paper Award** (Embedded System-Based Voice-Operated Wheelchair with Collision Avoidance and Speed Control) in the Presentation, Bannari Amman Engineering College.
- Featured as one of the **Top Performer Interns** in Zidio Development.

EDUCATION

- Bachelor's in **Electronics and Communication Engineering** - ANNA University, Francis Xavier Engineering College | 2021-2025
